Date of Booster _____

Signature of Veterinarian administering Vaccine

Date

Printed name of Veterinarian administering Vaccine

License Number

Clinic Name

Phone Number

Address City State Zip

Regardless of the date your stallion was vaccinated, he is required each year to have an annual vaccination (booster) prior to breeding.

Mandated recommendations:

Vaccinate 60 to 90 days prior to the breeding season.

You must isolate your stallion for 21 days following vaccination from other horses that are susceptible. This is very important.
